

Therapy Matters

A Workshop Series with Lynn Preston

In this once-a-month series, we will delve into eight pivotal dimensions of generative therapeutic process. These workshops are an interweaving of theoretical exploration and experiential demonstrations. They are designed to be accessible and challenging to both beginning and seasoned clinicians.

The concept of developing the therapeutic partnership is of primary interest to our integration of focusing and relational therapy. We will be talking about and showing how we foster the development of the therapist/client relationship and how the lens of looking at the therapeutic system itself can be of utmost importance to the process of growth.
